PROFESSIONAL SUMMARY

Full Stack Engineer | Java, Spring Boot & React Ecosystem. ~3.2 years of professional software development experience. Balanced full-stack delivery with Java/Spring Boot microservices on the backend and React/TypeScript on the frontend.

TECHNICAL SKILLS

Core Focus: Java, Spring Boot, React, TypeScript, REST APIs, Microservices, PostgreSQL, Docker

Backend Development: Java, Spring Boot, Spring MVC, Spring Security, Spring Cloud, Node.js, REST APIs, Microservices

Distributed Systems & Messaging: Kafka, RabbitMQ, Redis, WebSockets, API Gateway, Eureka

Databases & ORM: PostgreSQL, MongoDB, JPA / Hibernate, Prisma, Mongoose

Frontend Development: React, Next.js, TypeScript, JavaScript, HTML5 / CSS3, Chart.js

DevOps & Cloud: Docker, AWS EC2, Nginx, Git / CI/CD, Linux

Security & Auth: JWT, OAuth2, Auth0 SSO, RBAC

Core Engineering Fundamentals: System Design, High-Level Design (HLD), Low-Level Design (LLD), Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

Packaged App Development Analyst — Accenture (Mumbai, India | 2026-04 – Present)

- Developing scalable enterprise applications using Java, Spring Boot microservices, and modern API standards.

Software Developer — Tata Consultancy Services (TCS Digital) (Mumbai, India | 2023-06 – 2026-04)

- Developed enterprise applications using Java, Spring Boot Microservices, React, TypeScript, and Node.js, following layered architecture and RESTful API principles.
- Migrated ArcGIS authentication from frontend to backend and implemented JWT, OAuth2, and Auth0 SSO across 3 enterprise applications, resolving authentication and login issues.
- Integrated Spring Cloud Eureka Service Discovery and Spring Cloud Gateway for centralized routing and service communication, improving scalability and maintainability.
- Optimized caching, data structures, and session management, supporting 10,000+ concurrent users with zero data conflicts and achieving up to 80% faster load times; built real-time Chart.js dashboards improving engagement by up to 90%.

Software Engineer Intern — Sylvr (Remote, India | 2023-03 – 2023-06)

- Developed MERN stack applications for financial data visualization serving 50+ organizations, implementing REST APIs, OTP authentication, and role-based access control.
- Containerized applications using Docker and deployed on Linux servers with Nginx, achieving 98% uptime.

Research Intern — IIT Patna (Remote, India | 2022-01 – 2022-05)

- Worked on deep learning research involving emotion prediction, psychiatric disorder prediction from BCI signals, and audio classification.

KEY PROJECTS

TradeX — Realtime Paper Trading Platform [Tech: Java, Spring Boot, Spring Cloud, Eureka, API Gateway, Kafka]

- Built a self-contained market-data system generating price history for 15 Indian stocks/ETFs across 10 years with OHLCV data; implemented real-time price streaming using Kafka and WebSockets with Redis caching and PostgreSQL persistence.
- Designed a scalable stock trading platform using Spring Boot microservices with API Gateway, Eureka Service Discovery, authentication, market, and portfolio services.

VideoShare — Video Sharing & Streaming Platform [Tech: Node.js, React, MongoDB Atlas, Express, Docker, AWS EC2]

- Built a YouTube-like video-sharing platform with authentication, video streaming, likes, comments, subscriptions, playlists, and REST APIs.
- Implemented MongoDB Atlas fuzzy search and an NSFW content classification pipeline for videos and thumbnails; deployed using Docker, AWS EC2, and Nginx with 99% uptime.

EDUCATION

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering — Cochin University of Science and Technology, Kochi, Kerala, India (2019 – 2023 | CGPA: 8.91/10)
